MSc Veterinary Epidemiology

The examples below are based on data from the Graduate Outcomes Survey (GOS) Data for 2019-2023 (more info at: https://www.graduateoutcomes.ac.uk/).

LSHTM alumni were contacted 15 months after graduation and asked about their employment status. Data from 2019 to 2023 surveys are combined below.

Please note that not all students respond to the GOS.

Disclaimer:

- The number of entries for each degree is in no way an indicator of general employability of each course – numbers of students who have studied individual courses vary significantly and this obviously affects final graduate numbers (and survey responses)
- For many degrees with significant numbers of graduate destination information, a representative sample of jobs / employers are shown.
- For data protection purposes we have excluded details to ensure that those surveyed cannot be identified. Please do not use the information provided as a way to contact School alumni.

Example Organisations
